

## Westlands Water District

3130 N. Fresno Street, P.O. Box 6056, Fresno, California 93703-6056, (559) 224-1523, FAX (559) 241-6277

Since 1952, supplying agricultural water to farmers on the west side of the San Joaquin Valley.

*It is the mission of Westlands Water District to provide a timely, reliable and affordable water supply to its landowners and water users, and to provide drainage service to those lands that need it. To this end, Westlands is committed to the preservation of its federal contract, which includes water and drainage service, and to the acquisition of additional water necessary to meet the needs of its landowners.*

### **NOTICE OF JOB OPENING IN-HOUSE ONLY**

### **SENIOR FIELD ENGINEER**

***Applications Accepted August 24, 2015 through August 28, 2015***

**Monthly Salary Range:** DOQ: \$6,646-\$7,660

**Web Address:** [www.wwd.ca.gov](http://www.wwd.ca.gov)

#### **MINIMUM QUALIFICATIONS**

**Education and Experience:** Bachelor's Degree in Civil, Mechanical, or Agricultural Engineering, **and** four (4) years of civil, mechanical, or agricultural engineering experience, including the planning, design, construction, and operation of a pipeline distribution system and related hydraulic structures and equipment.

**License/Credential:** Possession of a valid Certificate of Registration as a Professional Engineer, Civil Engineer or Land Surveyor issued by the California State Board of Registration for Professional Engineers, Land Surveyors, and Geologists.

**Standard Requirement:** Possession of a valid California Class C Driver's License along with a driving record acceptable to the District's automobile insurance provider.

**Job Description:** The Senior Field Engineer performs complex engineering and technical work in the planning, design, construction, and capital projects of the District's distribution and pumping facilities and multi-disciplinary and policy analysis related to the preservation, restoration, land use and enhancement of District water resources which also include supervising or inspecting the work of consultants and contractors engaged in work related to the distribution system. The Senior Field Engineer requires an extensive engineering background in progressively difficult assignments, receives assignments in broad and general terms, has considerable latitude for independent actions and decisions, and is responsible for the day-to-day activities of subordinate staff.

The duties of the Senior Field Engineer position include, but are not limited to, interviewing, training, development, assigning and reviewing work, evaluating, and disciplining subordinate staff; and communication of division policy and objectives to staff. This position will also serve as a project manager on major engineering projects along with preparing or reviewing engineering designs, specifications, estimates, reports, and documents for projects related to maintenance, reconstruction and construction of District facilities. The Senior Field Engineer will monitor, evaluate and make recommendations regarding laws, codes, regulations and proposed legislation as they apply to related job duties and responsibilities; along with assessing and maintaining the District's Safety Program which includes serving as the District's Safety Officer.
