Meeting ID: 125 629 973

DISCUSSIONS ON:

- Best management practices to maximize irrigation and pump efficiency
- Updates to the Irrigated Lands Regulatory Program
- Compliance with the new Irrigation & Nitrogen Management Plans (Due March 2021)

Michael Johnson brings 35 years of experience with monitoring and reporting program design and implementation to the Irrigated Lands Regulatory Program. Dr. Johnson and his company, MLJ Environmental, have worked as consultants to agricultural coalitions since the ILRP was initiated in 2003. He has worked with the Westlands Water Quality Coalition for over 5 years helping the Coalition and its members remain in compliance with requirements ranging from surface water quality to ground-

Bill Green graduated from Fresno State with a B.S. in Agricultural Plant Science in 1980 and was a Field Operations Manager and General Manager for orchards and vineyard operations for 22 years. Bill has worked at the Center for Irrigation Technology (CIT) at Fresno State for 18 years. His research involves water and energy use efficiency for irrigation systems on the 1,000 acre Fresno State Farm Laboratory. Bill still manages and farms the family vineyard near Fresno.
