

By the Numbers: 2023 Crop Report

Farmers in Westlands Water District are some of the most productive and water efficient in the world – **producing 50+ high-quality crops**, while **supporting tens of thousands of jobs** and **feeding families** in the San Joaquin Valley and around the world. Agricultural production in Westlands Water District is critical to meeting California’s – and the nation’s – food supply and food security needs.

35,000+ jobs
supported by Westlands

The unique combination of weather and soil conditions in Westlands help farmers produce:

3.5% of the nation’s **fruit & nut crops**

5.4% of the nation’s **vegetables & melons**

\$4.7 billion
in annual farm-related **economic activity**

Total Acreage:
563,556

Total Producing Acreage:
329,710

Total Fallowed Acreage:
198,700*

*Value represents approximately 35% of total acreage. Historically, the amount of land fallowed increases as a result of inadequate water supply.

Top 10 Crops*

*by acreage

Almonds

Pistachios

Tomatoes

Wheat

Cotton

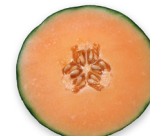

Grapes

Garlic

Grain Hay

Cantaloupes

Lettuce
