SLDMWA ..... San Luis & Delta-Mendota Water Authority
SWRCB ..... State Water Resources Control Board
USBR ..... United States Bureau of Reclamation

EXECUTIVE SUMMARY

This Engineer's Report has been prepared for the Westlands Water District (District) in accordance with the requirements of Proposition 218 and Article XIII D of the California Constitution. The purpose of the report is to establish and document a proposed land-based benefit assessment that equitably allocates costs associated with District operations, long-term water resource management, and United States Bureau of Reclamation (USBR) capital repayment obligations according to the proportional special benefits received by properties within the District.

The District's existing Proposition 218 assessment structure, adopted in 2017, is in its final year. The current assessment started in FY 2017-18 at $36.50/acre for Central Valley Project (CVP) users and $10.63 for other water supply users. The current assessment ends in FY 2026-27 with a maximum assessment of $45.30 for CVP users and $13.19 for other water supply users, according to the escalation table in the 2017 Engineer's Report. The proposed assessment would provide a new funding mechanism for specific fixed operational costs, State Water Resources Control Board (SWRCB) water rights fees, Golden Mussel maintenance costs, and debt service associated with the 2020A Revenue Bonds used to finance repayment obligations for CVP construction costs.

The proposed assessment is not intended to increase overall District revenues. Rather, it would shift recovery of certain fixed and long-term costs from existing land based and volumetric charges to a Proposition 218 assessment structure, with corresponding reductions to other charges where applicable. This approach is intended to improve cost stability, equitably distribute costs based on water-related special benefits received, and provide greater long-term financial certainty for the District and its landowners.

The District encompasses approximately 614,000 acres in western Fresno and Kings Counties and serves more than 500 family-owned farms. The District operates one of the most advanced agricultural water delivery systems in the United States, consisting of approximately 1,100 miles of buried pipeline and more than 3,000 water meters. Through its contract with USBR, the District is entitled to receive up to 1,195,000 acre-feet of CVP water annually, subject to hydrologic and regulatory conditions.

The proposed assessment is based on the principle that the primary special benefit provided by the District is access to water supply, water conveyance, and related water management services. In accordance with Proposition 218, assessments must be proportional to the special benefit conferred upon each parcel. To determine proportional benefit, ten years of historical water delivery data (2016 – 2026) was evaluated and established two land use categories:

- *Priority CVP Benefit – Lands eligible for Priority CVP water allocation; and*
- *Other Water Benefit – Lands eligible to receive supplemental water supplies and conveyance through the District system.*

Average annual water deliveries to these categories were used as the basis for allocating assessment costs proportionately. Lands within the Priority CVP Benefit category receive both the Priority CVP Benefit and supplemental water benefits. Lands in the Other Water Benefit category primarily receive supplemental and conveyed water benefits, although some may also receive secondary CVP water allocations when available.

Based on the adopted Fiscal Year 2026–2027 budget, approximately $39 million in annual costs could be appropriated for recovery through the proposed assessment. These costs include portions of fixed

operations and maintenance expenses, SWRCB water rights fees, Golden Mussel maintenance activities, and debt service payments associated with the 2020A Bonds.

The proposed maximum assessment rates for Fiscal Year 2027–2028 are:

- *$68.34 per acre for lands eligible for Priority CVP Benefit; and*
- *$18.02 per acre for lands eligible for Other Water Benefit.*

Because lands eligible for Priority CVP Benefit also receive supplemental water supply benefits, the total proposed assessment on those lands would equal $86.36 per acre for the first year.

Any new or increased assessment requires certain noticing and public meeting requirements by law. Prior to the passage of Proposition 218 (California Constitution Articles XIIIC and XIIID), legislative changes in the Ralph M. Brown Act defined a "new or increased assessment" to exclude certain conditions. These conditions included any assessment that does not exceed an assessment formula or range of assessments previously adopted by the agency or approved by the voters in the area where the assessment is imposed. This definition and condition were later confirmed through Senate Bill 919 (Proposition 218 implementing legislation).

The purpose of establishing an assessment range formula is to provide for reasonable and predictable annual adjustments to the maximum assessment without requiring costly noticing and mailed ballot procedures each year. Commencing with Fiscal Year 2028-2029, the maximum assessment may be increased annually to account for rising labor and material costs. The proposed assessment would remain in effect for a term of ten (10) years, commencing with Fiscal Year 2027-2028 and expiring at the end of Fiscal Year 2036-2037, unless extended through a new Proposition 218 proceeding.

The annual adjustment may occur every May when the parcels are assessed. The annual adjustment shall be equal to the greater of three percent (3%) or the percentage change in the Consumer Price Index for All Urban Consumers (CPI-U), All Items, West Region as published by the U.S. Department of Labor, Bureau of Labor Statistics (or its successor). In no event shall the annual increase exceed six percent (6%) without conducting a new mailed ballot proceeding. The maximum assessment establishes the legal upper limit that may be levied in any fiscal year, and it is independently recalculated each year to reflect the adjustment formula. The actual assessment levied may be set at or below this maximum, depending on the District's budgeted costs, and may remain unchanged in years when additional revenue is not required.

Any levy established at or below the adjusted maximum is not considered an increased assessment, even if it is higher than the levy imposed in the prior year. Only if the District's budget requires an amount greater than the adjusted maximum would the levy be deemed an increased assessment, in which case mailed balloting would be required in compliance with Proposition 218.

Implementation of the assessment would support continued delivery of surface water supplies, protection of water entitlements, maintenance of critical infrastructure, and the long-term operational reliability of the District's water delivery system.

Following the acceptance of this Engineer's Report, the Board will set a public hearing date, and mail notice and ballots to landowners. The Board will then hold a public hearing at which all landowners affected by the assessments may give oral or written testimony, comments, and protests, and are entitled to vote upon the proposed maximum assessment rates by submitting a protest ballot prior to the close of the public input portion of the public hearing. At the public hearing, the District will consider and address comments and questions from District landowners, and any written protest or written objections received. Landowner

ballots received prior to and by the close of the public input portion of the public hearing will then be counted.

If majority protest exists for the proposed assessment, further proceedings to implement the new assessment shall be abandoned at that time. If tabulation of the ballots indicates that majority protest does not exist for the proposed assessment and the assessment range formula presented and described herein, the Board may adopt this Report (as submitted or amended); approve the district diagram(s) contained herein; direct the improvements to be made; and confirm and approve the assessments as presented in this Report.

The public hearing is scheduled for December 15, 2026, at the District's Fresno office at 286 W Cromwell Ave, Fresno, CA 93711.

AB 2257, effective January 1, 2025, codifies Government Code §§ 53759.1 and 53759.2, which authorizes public agencies to implement an exhaustion of administrative remedies requirement in the context of Proposition 218 proceedings and specifies the scope of a Court's review of the administrative record if the local agency complies with certain specified requirements. If these requirements are met by the local agency, any party wishing to preserve their right to legally challenge the Assessment after its adoption is required to submit a written objection regarding a proposed assessment during the property-owner protest ballot proceeding and by a specified deadline not less than 45 days after mailing of the ballot and notice pursuant to Proposition 218. Failure to do so will preclude a party from filling a legal challenge to the assessment. To implement this requirement, the local agency is required, among other things, to prepare written responses to the timely submitted objections and present them to the local agency governing body, which will make certain specified determinations prior to the close of the Proposition 218 proceeding. This process runs concurrently with the Proposition 218 property-owner protest ballot proceeding and does not impact a property owner's ability to submit a protest pursuant to Proposition 218.

The District intends to comply with AB 2257 written objection procedures for this Proposition 218 proceeding. Instructions for submitting written objections will be included in the notice of public hearing mailed to affected landowners at least 45 days prior to the public hearing. The District will prepare written responses to all timely submitted written objections and present them to the Board of Directors for consideration prior to the close of the Proposition 218 proceeding.

1 PURPOSE OF THE REPORT

1.1 GENERAL

Westlands Water District (District) is in the final year of the 2017 assessments, which were approved for 10 years. This Engineer's Report is prepared in accordance with Proposition 218 to describe an equitable distribution of the special benefits to be derived by each parcel upon which the proposed assessments will be levied. If approved, this assessment will be levied annually at a rate not to exceed the maximum rate identified in this Engineer's Report. This assessment will be used to fund District activities necessary to sustainably manage water resources and USBR capital repayment debt service.

1.2 PROPOSITION 218 REQUIREMENTS

Proposition 218, entitled "the Right to Vote on Taxes Act", which added Article XIII D to the California Constitution, was adopted by the voters in 1996. Proposition 218 limits the methods by which local governments can increase taxes, fees, and charges without taxpayer consent or the opportunity to protest changes to any property-related fees or special benefit assessments. Proposition 218 requires the District to provide public notification of the proposed changes, inform property owners of the protest mechanism and the time frame for response, and provide a public hearing on the proposed rates. The public hearing must be held not less than 45 days after the mailing of the notice.

In general, before a local agency can levy new or increased assessments subject to Section 4 of Article XIII D of the Constitution, the following procedures are required:

1. Preparation of a detailed engineer's report, prepared by a registered engineer certified by the State of California, that supports each assessment.
2. The record owner of each parcel identified for assessment shall be given a written notice of each assessment, including the total amount charged to the owner's particular parcel, duration of the payments, reason for the assessment, and basis for the calculation.
3. Notice to the record owner must specify the time, date, and location of the public hearing (protest hearing) on the assessment; the notice shall also include a ballot and describe the voting procedures and statements in support and opposition to the assessment.
4. A public hearing, held not less than 45 days after mailing the notice, to consider protests and tabulate the ballots.
5. If ballots submitted in opposition to the assessment represent a majority of the financial obligation of the returned ballots (weighted based on financial obligation per unit acre) a majority protest exists and the District must abandon the proceedings. If a majority protest does not exist, the District may approve and levy the assessments.

In order to calculate the proposed assessment, the District must specify the services or improvements to be funded and their costs and determine the special benefits conferred on properties by those services or improvements. The assessment on each property must be in proportion to its special benefits received.

1.3 REVENUE OBJECTIVES

All District operations are currently funded through a mix of water charges, land based charges, and other revenues. The District is not proposing to increase its total revenues through the proposed benefit assessment. Rather, it is proposing to shift the recovery of the costs of certain District activities to the proposed assessment, with a corresponding reduction in other charges, as discussed in Section 4. The proposed assessment is limited to the expenses described in this report.

2 DISTRICT BACKGROUND INFORMATION

2.1 GENERAL

The District, formed in 1952, is a California Water District, pursuant to the California Water District Law (Division 13 of the California Water Code). As a California Water District, the District may raise money for district purposes by assessment, and fix and collect charges for the provision of water (Division 13, Section 35470 of the California Water Code).

The District is governed by a board of nine members each of whom is a District landowner, a designated representative, or legal representative of a landowner. Board elections are held every two years, and Directors are elected to four-year terms of office. Currently, each landowner in the District is allowed one vote for each dollar's worth of land to which he/she holds title. Regular board meetings are held once a month.

2.2 LOCATION

The District is the largest agricultural water district in the United States, made up of more than 1,000 square miles of prime farmland in western Fresno and Kings Counties on the west side of the San Joaquin Valley as shown in Figure 2-1. The District is located between the Diablo Range of the California Coast Range Mountains and the trough, or lowest point, of the San Joaquin Valley in western Fresno and Kings Counties. The District is roughly 15 miles wide and 74 miles long which encompasses and provides service to over 614,000 acres. Under federal contracts, Westlands provides water to 500 family-owned farms that average 911 acres in size.

2.3 HISTORY

The District was formed under California Water District Law in 1952 upon petition of landowners located within the District's proposed boundaries. Nearly all land within the current District's boundary was farmed using groundwater prior to the construction of the Central Valley Project (CVP).

Contract negotiations between the District and the United States Bureau of Reclamation (USBR) to provide a dependable, supplemental supply of surface water through the CVP began shortly after the District's formation. At that time, the federal government was considering the development and construction of the CVP. This involved cooperation between the federal and state governments regarding shared water storage facilities and conveyance systems.

The original District size was approximately 376,000 acres. In 1965, it merged with its western neighbor, Westplains Water Storage District, adding 210,000 acres. Additionally, lands comprising about 28,000 acres were annexed to the District, after the merger in 1965, to form the current 614,000-acre District with an irrigable acreage of 563,607 acres.

Westlands By The Numbers

PROJECT FACILITIES

San Luis Canal / California Aqueduct

Length in District	68.67 miles
Maximum Top Width	257 feet
Maximum Bottom Width	110 feet
Maximum Depth	36 feet
Capacity at:	
- Panoche Creek	13,000 cfs
- Kettleman City	8,100 cfs

Coalinga Canal

Total Length	12.8 miles
Length of Canal	11.5 miles
Maximum Top Width	60 feet
Maximum Bottom Width	12 feet
Maximum Depth	16 feet
Capacity:	1,100 cfs

DISTRICT INTERNAL DISTRIBUTION SYSTEM

Total Pipeline Length	1,034 miles
Maximum Pipeline Diameter	96 inches
Minimum Pipeline Diameter	10 inches
Ag Deliveries	3,300+ meters
Non-Ag Deliveries	244 meters
Number of Laterals:	
- San Luis Canal	38 Left, 26 Right laterals
- Coalinga Canal	6 laterals

General Information

- Width of District – 15 miles
- Length of District – 74 miles
- Gross Area – 614,000 acres
- Buried Pipeline – Approx. 1,034 miles
- Water Meters – Approx. 2,432 active AG meters
  – Approx. 253 active M&I meters
  – Approx. 699 ground well meters

Westlands Water District Map

Figure 2-1

2.4 WATER SUPPLY

The District contracts with the USBR to deliver up to 1,195,000 acre-feet of CVP water to its more than 500 family-owned farms. The total water available is about 13 percent short of the 1.4 million acre-feet required to water the entire irrigable area in the District. In order to adapt to ongoing supply shortages, the District continues to fund increased education and technology enabling growers to effectively utilize water allotments, resulting in some of the most productive and water-efficient farms in the world.

2.5 EXISTING FACILITIES

The District receives water from the San Luis Canal/California Aqueduct and the Coalinga Canal. Within the District, there is about 69 miles of the San Luis Canal with a capacity of 13,000 cfs to the north and a capacity of about 8,100 cfs at the southern end of the District. The Coalinga Canal, located in the southwest portion of the District, is about 13 miles long with a capacity of 1,100 cfs. The District then delivers water within their service area through their enclosed distribution system.

The District's water distribution system is comprised almost entirely of buried pipeline (approximately 1,100 miles of pipe) and is outfitted with over 3,000 water meters. The District continually invests in this sophisticated system, which measures every drop of water and minimizes losses caused by seepage and evaporation. The District is among the few, if not the only, agricultural water agencies in the United States that distributes water through an entirely enclosed system.

2.6 DISTRICT CHARGES AND ASSESSMENTS

District costs are currently allocated to landowners and/or water users through assessments, land based charges, and/or volumetric charges. The District water rates and charges are comprised of land based charges, Sustainable Groundwater Management Act charges, usage charges, Groundwater management program and temporary facilities, Account Monitoring Charges, and M&I Charges. Section 3.2 provides detail on the District's rate structure.

3 DISTRICT OPERATIONS AND RATE INFORMATION

3.1 DISTRICT OPERATIONS

The District's operating costs are greatly influenced by the volume and the cost of water supply delivered to the growers. Total costs include costs for water operation (purchases, pumping, transmission and distribution, and customer accounts), and general and administrative functions. Revenue sources include land based charges, Agricultural and Municipal and Industrial (M&I) water sales, grants, assessments, and proceeds from the sale of District land.

3.1.1 FY 2026-27 ADOPTED BUDGET

Pursuant to requirements of State law, the District establishes an operating budget on an annual basis. The District's fiscal year 2026-27 (March 1, 2026, to February 28, 2027) budget was reviewed for this report. A summary of the general expenses by major categories is shown in Table 3-1. All expenditures and projects must have Board approval to be funded by the designated funds. The District's adopted budget shows total estimated expenditures of $217,130,100 for FY 2026-27

Table 3-1 Fiscal Year 2026-27 Expense Summary Budget

Expense	2026-2027 Adopted Budget
Variable O&M	$169,613,000
Fixed O&M	$34,247,200
Debt Repayment	
SLDMWA DHCCP 2021B	$1,641,800
2020A BONDS	$11,628,100
Total	**$217,130,100**

3.2 DISTRICT RATE INFORMATION

District costs are currently allocated to landowners and/or water users through assessments, land based charges, and/or volumetric charges. The different categories represent different levels of water service, water supplies, and/or legal settlements.

3.2.1 DESCRIPTIONS OF EXISTING RATES AND CHARGES

The District water rates and charges are comprised of land based charges, Sustainable Groundwater Management Act (SGMA) charges, usage charges, Groundwater management program and temporary facilities, Account Monitoring Charges, and M&I Charges.

Table 3-2 Rate Classification and Charges (2026-27)

Agricultural Water Rates		
United States Bureau of Reclamation [1]		
Description	Cost of Service	
Water Rates	$36.06	
Restoration Fund	$13.64	
San Luis Delta Mendota Water Authority [2]		
Description	Cost of Service	
Authority O&M – Actual 25%	$75.32	
Westlands Water District [3]		
Description	Cost of Service	
District O&M	$42.02	
Water Exchange Obligation [4]	$4.02	
SWRCB Water Rights Fee	$7.53	
Total Agricultural Water Rate	**$178.59**	
Transfer Out O&M Credit	($14.85)	
Municipal and Industrial Water Rates		
Description	Cost of Service	
Acquired Supply	$233.44	
Acquired Supply -NASL	$908.72	
Land Based Charges		
Description	Amount	Unit
District Water Supply D.S. – Area 1	$ –	AC
District Water Supply D.S. – Area 2	$ –	AC
Extraordinary Repairs of Pipe – Area 1 and Area 2	$3.00	AC
Drainage Service Area	$ –	AC
Westlands Water Quality Coalition	$3.73	AC
Sustainable Groundwater Management Act	$2.50	AC
USBR Capital Repayment Debt Service	$12.66	AC
Benefit Assessment Charges [5]		
Description	Amount	Unit
Eligible for Other Water Supply	$13.19	AC
Eligible for CVP Allocation [6]	$45.30	AC
Sustainable Groundwater Management Act		
Description	Amount	Unit
Service Charge Per Groundwater Well Location	$2,750.00	EA
Usage Charges		
Description	Amount	Unit
Overuse of Water Supply	$718.00	AF
Administrative Fee [7]	$388.37	Mile

Groundwater Management Program & Temporary Facilities		
Description	Amount	Unit
Groundwater Management Program	Varies by Facility	AF
Temporary Facilities Surcharge	Varies by Facility	AF
Temporary Facility Credit [8]	($16.18)	AF
Account Monitoring Charges		
Description	Amount	Unit
Overuse Monitoring	$5,543.00	EA
Delinquent Payment Monitoring	$73.00	EA
Advanced Payment Monitoring	$280.00	EA
Meter Turn Off for Use Without Order	$1,055.22	Per Lateral
Municipal and Industrial		
Description	Amount	Unit
M&I Inspections [9]	$79.87	EA
Acquired Supply Advance [10]	$233.44	EA

[1] – U S Bureau of Reclamation rates calculated the Districts rates on the basis of a 42.28% CVP water supply

[2] – San Luis Delta Mendota Water Authority rates are on the basis of 25% CVP supply and estimated water use

[3] – Westlands Water District rates are calculated on the basis of 20% CVP Supply plus Other Water resulting in 398,220 AF Total Estimated Supply

[4] – Water Exchange Obligation rate is not paid by Pre-Merged or Annexed lands

[5] – As listed in the 2017 Benefit Assessment Engineer's Report

[6] – Land eligible for CVP Allocation are also eligible for other water delivery; therefore the rate is the sum of both category assignments.

[7] – Charged per mile of lateral drained for each delivery point

[8] – Temporary Facility Credits are billed on a per acre-foot basis for water delivered through temporary facilities

[9] – M&I Backflow Inspection costs are billed annually to each non-agricultural connection

[10] – Advance requirement doubles if prior year annual use is greater than one acre-foot. Based on adopted Acquired Supply rate.

4 PROPOSED EXPENDITURES TO RECOVER

4.1 GENERAL

The District proposes to convert components of its fixed O&M and certain bond debt payments to a benefit assessment and correspondingly reduce the amounts of these costs recovered from other revenue sources. As a result, the total revenue to the District would remain unchanged.

4.2 EVALUATING BENEFIT ASSESSMENT APPLICABILITY

The 2026-27 budget was reviewed with District staff to identify the expenses to include in the assessment and identify items not to include. The following identifies the expenses that were reviewed for the assessment.

4.2.1 EXPENSES INCLUDED IN THE PROPOSED ASSESSMENT

The following expenses were reviewed and included in the proposed assessment:

- *SWRCB Water Rights Fees*
    - The Water Purchases expense in the District budget includes multiple items including the SWRCB Water Right Fees. The State Water Resources Control Board (SWRCB) sets fees to cover regulatory and administrative costs associated with managing water resources at the state level. These fixed SWRCB fees will move from the water rates to the 218 assessment.
- *Fixed O&M*
    - The majority of the assessments consist of fixed O&M costs. Most O&M expenses are funded completely through the assessment unless there are other funding sources available such as grant funding or extraordinary pipe repair costs that are part of land based charges. The other exception is wages and benefits, which are allocated equally between assessments and general fund after accounting for any other applicable funding sources within the budget.
- *Capital Improvement Plan*
    - A Capital Improvement Plan (CIP) for a water district is a strategic, long-range blueprint for funding, building, and maintaining vital infrastructure. A CIP acts as the bridge between a water district's long-term physical master plan and its annual operating budget. The District's draft CIP budget included 10 years of projected costs for proposed projects. Although these costs are already incorporated into the Fixed O&M budget, they were reviewed to confirm that sufficient funding has been allocated to support the planned projects.
- *Golden Mussel Maintenance*
    - The invasive golden mussel (Limnoperna fortunei) is a highly destructive freshwater bivalve native to Asia that was first discovered in North America in October 2024 within California's Sacramento-San Joaquin Delta. They pose a massive threat to the state's water infrastructure, native fish, and agriculture. Estimated costs for maintenance to manage the Golden Mussels are included in the 218 assessment.
- *Debt Service*
    - The District's budget includes funding for debt service associated with the Westlands Water District Financing Authority Revenue Bonds, Series 2020A. These bonds were issued to finance the prepayment of the District's remaining obligation for construction costs related to the Central Valley Project (CVP).
    - Debt service payments for the Series 2020A Bonds are currently funded through land based charges. Moving forward, repayment obligations will be funded through assessments established pursuant to Proposition 218. This accounts for $19.84 of the CVP users assessment and $5.23 of the other water users assessment. As a result, land based

charges will be reduced following implementation and collection of the Proposition 218 assessment. A public meeting will be held to adopt the revised lower land-based charge following the first collection of the Proposition 218 special benefit assessment.

4.2.2 EXPENSES NOT INCLUDED IN THE PROPOSED ASSESSMENT

The following expenses were reviewed and are not included in the proposed assessment:

- *Legal and Consultant fees*
  - The District's budget includes legal and consultant fees. These expenses were reviewed to evaluate whether they could appropriately be allocated to the assessment. Following the review, it was determined that these costs are variable rather than fixed in nature and, therefore, should remain categorized as land based charges and not part of the proposed assessment.
- *Extraordinary Pipe Repair*
  - The Extraordinary Pipe Repair Land Based Charge was developed to collect funds for pipe repair failures that require immediate action at any point along the District's distribution system as well as large pipeline replacements that affect the entire District. The Extraordinary Pipe Repair is governed by the Sagouspe Agreement. This fee will stay under the land based fees and will not be included in the proposed 218 assessment.
- *SGMA Charges*
  - The District serves as the Groundwater Sustainability Agency (GSA) for the San Joaquin Valley Basin Westside Subbasin, Department of Water Resources Bulletin 118 Basin No. 5-022.09 (Basin). The GSA adopted the Basin Groundwater Sustainability Plan (GSP) on January 23, 2020, and further amended on December 17, 2024. The purpose of the SGMA land based charge is to fund ongoing GSA administration and implementation costs of the GSP. This fee will stay under the land based fees and will not be included in the 218 assessment.

4.3 EVALUATING EXPENSES TO INCLUDE IN AN ASSESSMENT

The assessment is based on long-term water entitlement, system access, and operational readiness. Based on the review of expenses and applying the criteria in Section 4.2, expenses were identified as appropriate for recovery through the proposed assessment. Table 4-1 shows the expenses to be recovered through the proposed assessment and through other, existing rates and charges, based on the adopted 2026-27 budget. The expenses to be recovered from the assessment total roughly $39 Million in 2026-27.

Table 4-1 2026-27 Expenses for Proposed Assessment

Expense	2026-2027 Adopted Budget	Recovered from Other Rates and Charges	Proposed 26-27 Assessment Allocation	Proposed 27-28 Assessment Allocation [2]
Variable O&M	$169,613,000	$167,813,000		
SWRCB Water Rights Fees			$1,800,000 [1]	$1,868,400
Fixed O&M	$34,247,200	$11,351,750	$22,895,450	$23,765,477
Golden Mussels Maintenance			$2,700,000	$2,802,600
Debt Repayment				
SLDMWA DHCCP 2021B	$1,641,800	$1,641,800		
2020A BONDS	$11,628,100		$11,628,100	$11,628,100
Total	**$217,130,100**	**$180,806,550**	**$39,023,550**	**$40,064,577**

[1] The fixed cost of SWRCB Water Rights Fees will be moved from water rates to the Proposed Assessment

[2] Escalation factor applied to 26-27 proposed assessment allocation to get 27-28 proposed assessment allocation

The Board will have authority to move funding to sub-categories needing additional funding or to offset additional costs within the major categories with grants or other funding that may become available to the District, as long as the total costs do not exceed the maximum assessment proposed in this report. Additionally, if funds are available from the levied assessment that are beyond the immediate needs of the District, the Board may choose to establish prudent reserves for anticipated costs within these major cost categories.

It will be up to the Board to set the annual assessment rate and the Board may choose to set the rate lower than the maximum rate described in this report and approved by the landowners. The proposed maximum annual rate gives the Board flexibility to address increases in operating costs without the need to incur the expense of routinely repeating the Proposition 218 process.

4.3.1 TERM AND ESCALATION OF ASSESSMENT TO COVER FUTURE COST INCREASES

Any new or increased assessment requires certain noticing and public meeting requirements by law. Prior to the passage of Proposition 218 (California Constitution Articles XIIIC and XIIID), legislative changes in the Ralph M. Brown Act defined a "new or increased assessment" to exclude certain conditions. These conditions included any assessment that does not exceed an assessment formula or range of assessments previously adopted by the agency or approved by the voters in the area where the assessment is imposed. This definition and condition were later confirmed through Senate Bill 919 (Proposition 218 implementing legislation).

The purpose of establishing an assessment range formula is to provide for reasonable and predictable annual adjustments to the maximum assessment without requiring costly noticing and mailed ballot procedures each year. Commencing with Fiscal Year 2028-2029, the maximum assessment may be increased annually to account for rising labor and material costs. The escalation formula is designed to maintain the proportionality of the special benefit conferred on each parcel by tracking increases in the costs of providing the assessable services. Because the escalation applies uniformly to all assessed parcels

based on the same cost categories identified in this Report, the proportional relationship between the assessment and special benefits received is preserved in each adjusted year.

The annual adjustment will occur every May when the parcels are assessed. The annual adjustment shall be equal to the greater of three percent (3%) or the percentage change in the Consumer Price Index for All Urban Consumers (CPI-U), All Items, West Region as published by the U.S. Department of Labor, Bureau of Labor Statistics (or its successor). In no event shall the annual increase exceed six percent (6%) without conducting a new mailed ballot proceeding. The maximum assessment establishes the legal upper limit that may be levied in any fiscal year, and it is independently recalculated each year to reflect the adjustment formula. The actual assessment levied may be set at or below this maximum, depending on the District's budgeted costs, and may remain unchanged in years when additional revenue is not required.

Any levy established at or below the adjusted maximum is not considered an increased assessment, even if it is higher than the levy imposed in the prior year. Only if the District's budget requires an amount greater than the adjusted maximum would the levy be deemed an increased assessment, in which case mailed balloting would be required in compliance with Proposition 218.The factor is not applied to the portion of the proposed assessment for the 2020A Bond repayment as those costs are fixed.

5 BENEFIT DETERMINATION

5.1 GENERAL

Proposition 218 makes a distinction between general and special benefits provided by a project or service. A general benefit is defined as something that benefits the general public. A special benefit is defined as a particular benefit to land and buildings. The District's purpose as a special district is to provide the special benefit of water supply and associated water-related services to the lands within the District. These services do not accrue to the public at large and are not considered general benefits.

Proposition 218 also requires that assessments not "exceed the reasonable cost of the proportional special benefit conferred on that parcel." This Engineer's Report proposes the implementation of special benefit assessments. Therefore, this report must identify all parcels that will have a special benefit conferred upon them, and the proportional special benefit to those parcels. The parcels that have been identified as being assessable are shown in Figure 5-1. Assessable District Parcels are reflected in the proposed assessment roll in Appendix A. The assessment shall continue to apply to successor parcels.

Because the District water supply, water conveyance, and related services are delivered exclusively through a closed, buried pipeline system accessible only to lands with physical connections to the system, and because no member of the general public may access or use these facilities, the services funded by this assessment confer no general benefit to the public at large. The District services are distinguishable from public amenities such as parks or open spaces (cf. Silicon Valley Taxpayers Assn v. Santa Clara County Open Space Authority (2008) 44 Cal. 4th 431; Beutz v. County of Riverside (2010) 185 Cl. App 4th 1516), which by their nature are accessible to the general public. Accordingly, 100% of the costs included in the proposed assessment are attributable to special benefits, and no deduction for general benefits is required.

The District owns 64,968.27 acres within the special benefit assessable boundaries. District-owned lands are not eligible to receive surface water from any source (CVP or Other Water) or groundwater. Because these lands do not receive any of the special benefits included in the special benefit assessment, they are not assessed.

In addition to the District-owned lands described above, other lands excluded from the assessment include certain federally and state-owned parcels, such as those owned by the USBR, the State of California, and other public agencies that are not eligible to receive surface water or groundwater service. Also excluded are Class 6 lands and a small number of parcels subject to restrictive covenants prohibiting surface water rights. Together with the 64,968.27 acres of District-owned lands, these exclusions account for the approximately 92,000 acres within the District's boundaries that do not receive the special benefits provided by the assessment and therefore are not assessed.

5.2 SPECIAL BENEFITS CONSIDERED AS THE BASIS FOR AN ASSESSMENT

The District's primary responsibility and purpose is to deliver CVP water supply to lands eligible to receive an annual allocation of CVP water. For the purposes of a benefit assessment, this is a special benefit to those lands, because not all lands within the District are eligible to receive such an allocation. The District also provides supplemental water (including to lands without a CVP allocation), conveys (wheels) water for individual landowners, and provides other, water-related services to lands within its boundaries. Although Other Water Benefit lands do not receive the benefit of a Priority CVP water allocation, they are able to utilize the District's facilities to convey and receive water from other sources. In addition, they may be eligible to receive secondary CVP water allocations when available. These are also special benefits that do

not accrue to the public at large, but only to lands having access to and ability to make beneficial use of the District's distribution system and/or water supplies. The expenses included in the proposed assessment provide the necessary special benefits to maintain the system and ensure the continued delivery of water.

5.2.1 LANDS ELIGIBLE TO RECEIVE CVP ALLOCATION

The District has a CVP water service contract with USBR for water supply. The District's contracting and delivery of this water to lands eligible to receive it constitute the most significant special benefit provided to lands in the District. The large majority of the water delivered by the District is CVP water, which on average represents three-quarters of the delivered water. This average is based on water supply data for water years 2017 through 2026.

Most, but not all, of the lands eligible for water provided by or wheeled by the District are also eligible to receive the benefit of a Priority CVP water allocation. Lands eligible to receive CVP irrigation water are offered a per-acre allocation of available CVP supply. In years when the District receives its full contract amount, each eligible acre is entitled to receive up to 2.6 acre-feet per acre. During shortage years, CVP water allocated to eligible lands is reduced proportionately. Some Other Water Benefit lands that are not eligible for a Priority CVP water allocation, may be eligible for a Secondary CVP water allocation.

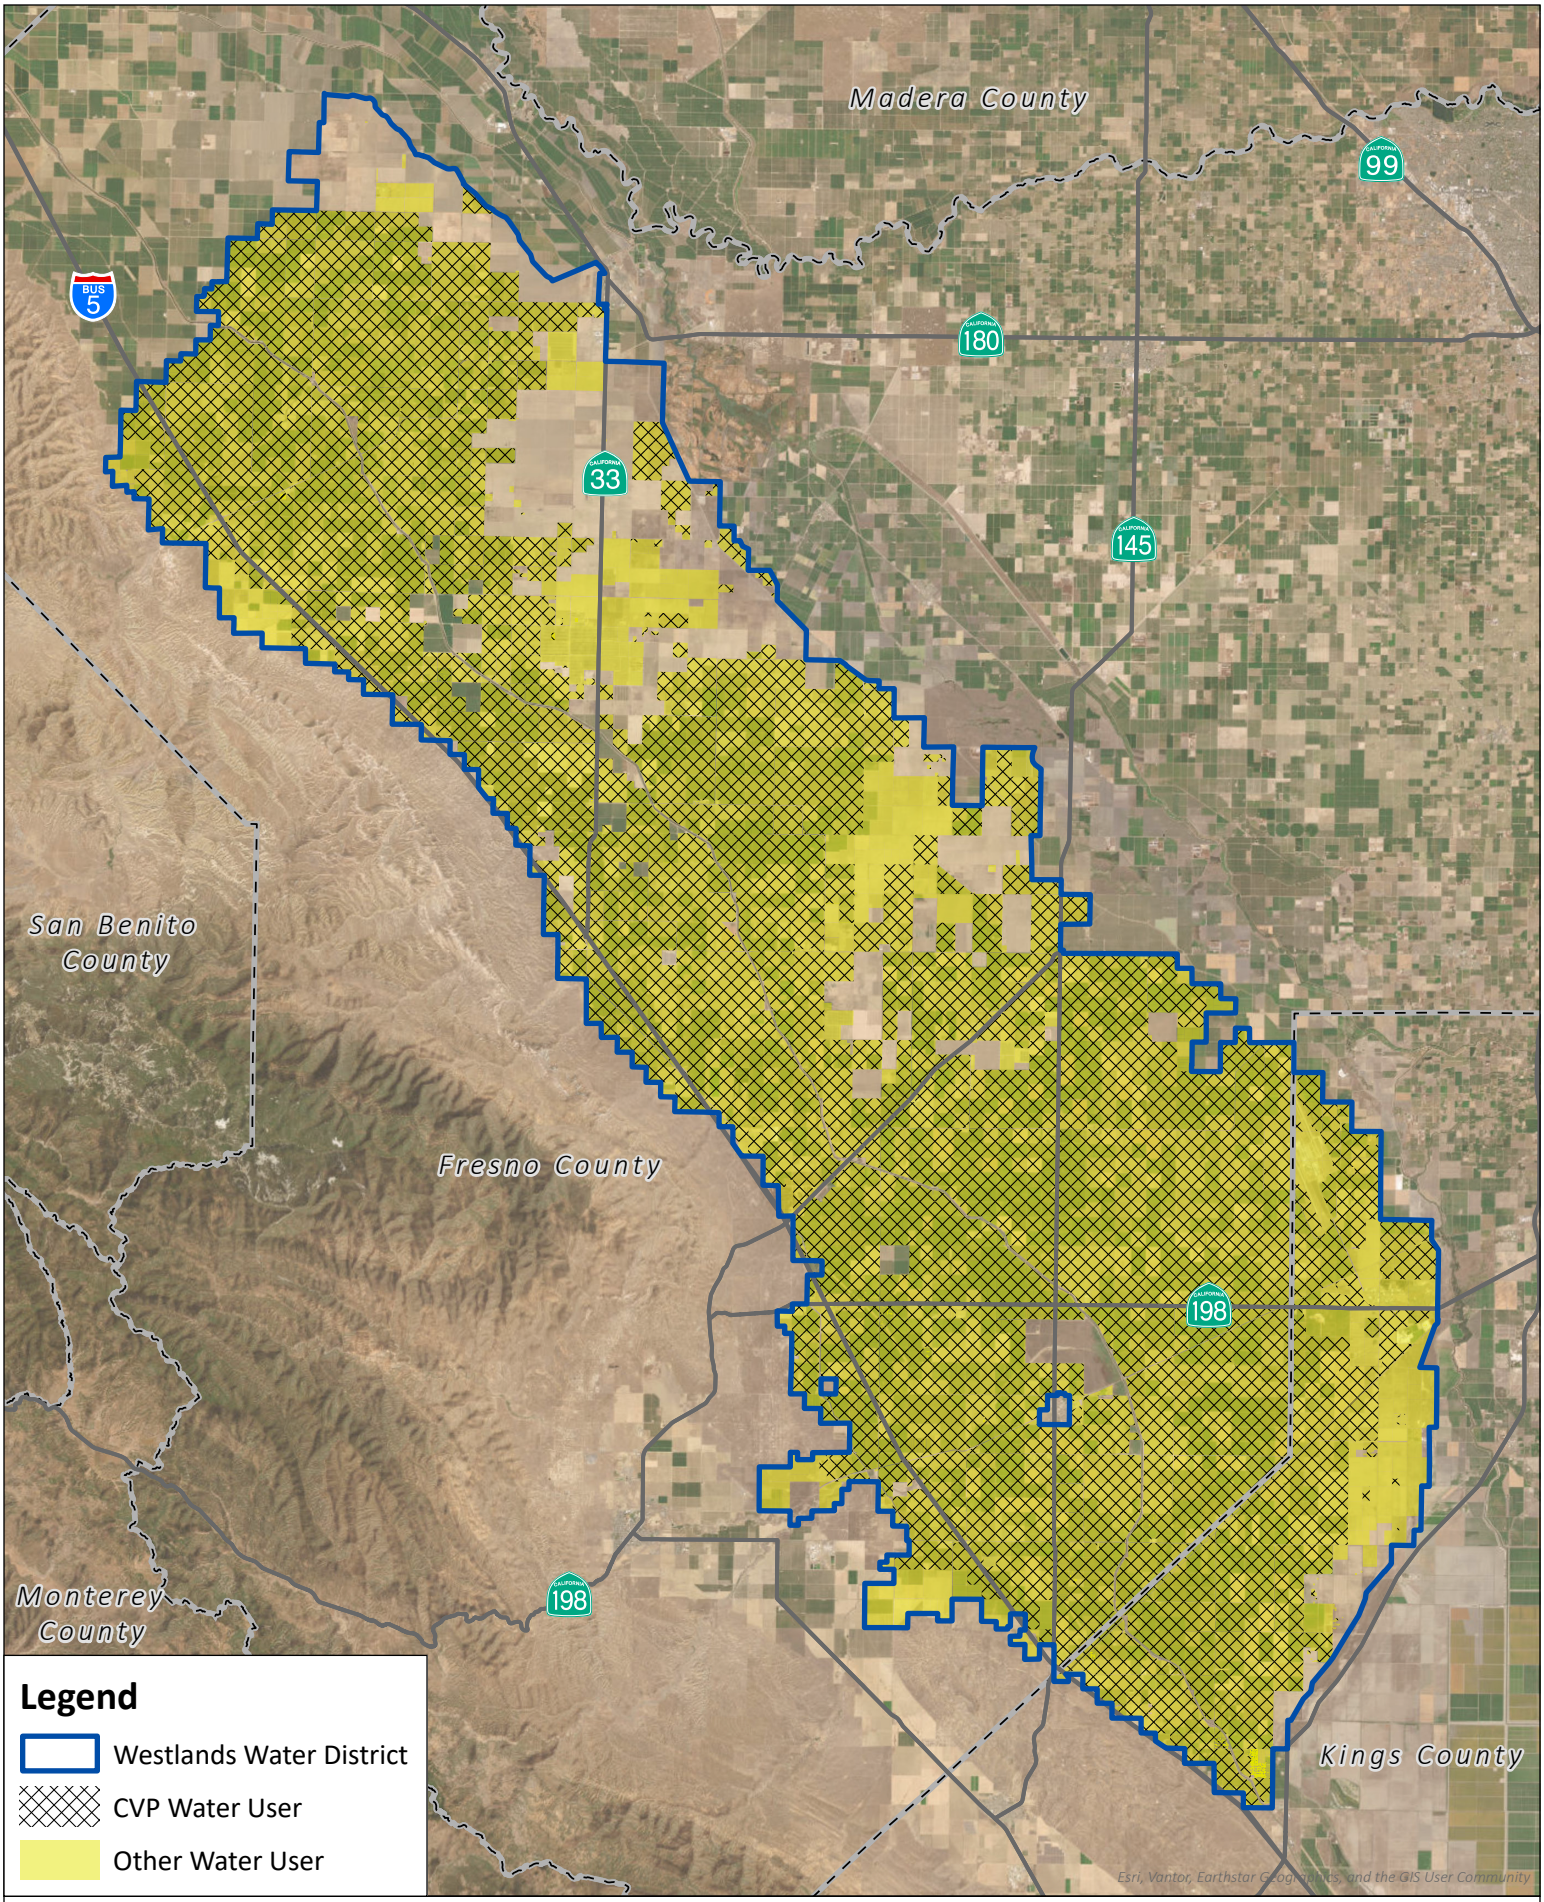
5.2.2 LANDS ELIGIBLE TO RECEIVE DISTRICT WATER SUPPLY

The District provides water, drainage, and groundwater management services to landowners and water users within the District. In addition, all properties within the District that are eligible to use District facilities to convey water purchased elsewhere when facilities are available receive this benefit. Additional special benefits considered, but ultimately not included, were access to the District's power program and being part of the Groundwater Sustainability Agency.

5.2.3 LANDS ELIGIBLE TO RECEIVE OTHER WATER SUPPLY.

These are special benefits that accrue to any lands that are within the District's distribution system service area and that can make beneficial use of the delivered water. The District provides supplemental water supplies and water conveyance services for both lands that are eligible to receive a Priority CVP water allocation and lands that do not. These benefits include access to supplemental water supplies purchased by the District and the ability to convey ("wheel") water obtained from other sources (surface water).

Some lands within the District do not receive this special benefit. In addition, the District has purchased the water rights for certain properties within its boundaries for drainage management and other purposes. These lands no longer receive special benefit from the District's CVP water entitlement, or cannot receive other water supply, are non-irrigable, or retired lands.



Assessable District Parcels

Westlands Water District

Figure 5-1

PROVOST& PRITCHARD

5.3 SPECIAL BENEFITS VS. GENERAL BENEFITS

Article XIII D Section 4 of the California Constitution requires that, for purposes of a benefit assessment, special benefits must be distinguished from any general benefits that the funded services may provide to all lands or residents within the District. The assessment may only be imposed for special benefits, defined as "a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large". These are special benefits that accrue to any lands that are within the District's distribution system service area and that can make beneficial use of water conveyed through District facilities. For this proposed assessment, the District provides special benefits of access to water supply, water conveyance and delivery facilities, and other water-related benefits to identified categories of land within District boundaries. Some lands within the District do not receive these special benefits due to their inability to make beneficial use of water supply. These include so-called Class 6 lands that are unsuitable for irrigation, and drainage-impaired lands not in production because the District has purchased their CVP allocable entitlement.

5.3.1 PROPORTIONATE SPECIAL BENEFITS

Article XIII D Section 4 of the California Constitution also requires that the proposed annual assessment on each parcel must be based on the proportionate special benefits conferred on that parcel, in relation to (multiplied by) the total annual cost to be recovered through the assessment. The District's overriding purpose is to deliver water to its customers. Therefore, the most appropriate way to measure the special benefit provided by the District is by the amount of water delivered by the District to the different lands within its boundaries. CVP contract deliveries and other water deliveries vary substantially from year to year based on hydrologic variability and regulatory conditions, so delivery over a span of the most recent years is the most appropriate way to measure special benefits going forward. On average, Other Water users receive lower water deliveries than CVP water users, while continuing to rely on the same facilities to convey and receive these alternative water supplies. Delivery to a set of identified land use categories over a number of years, as a proportion of total delivers to all lands, is determined to be the best way to apportion the costs. The District provided 10 years of historical delivery data for this analysis, Table 5-1. The next section describes the land use categories.

Table 5-1 Historical Water Deliveries

Total Water Deliveries per water year		
	Total Deliveries	
Water Year	CVP	Other
2016-2017	(32,520)	(242,139)
2017-2018	(828,335)	(181,943)
2018-2019	(538,493)	(122,862)
2019-2020	(839,177)	(75,621)
2020-2021	(267,672)	(139,638)
2021-2022	(45,466)	(142,504)
2022-2023	(3,763)	(137,949)
2023-2024	(891,608)	(154,595)
2024-2025	(639,990)	(110,680)
2025-2026	(629,011)	(138,096)
Total	**(4,716,035)**	**(1,446,027)**
Average	**(471,604)**	**(144,603)**

Note: Priority CVP Benefit lands are eligible for both Priority CVP water allocations and supplemental water supplies. Other Water Benefit lands primarily receive supplemental water supplies and water conveyed through the District's system, although some may also be eligible to receive a secondary CVP water allocations when available.

5.4 LAND USE CATEGORIES

The benefit assessment will be charged to each parcel based on its irrigable acreage and land use category. Land use categories are groupings of parcels receiving the benefit of access to water supply provided by the District. Therefore, the land use categories correspond to different levels of special benefits received. There are two land use categories in the District that are proposed for a benefit assessment: land eligible for Priority CVP Benefit and land eligible for Other Water Benefit. The average water supply delivered to each of the land use categories is the measure of the proportionate special benefit received by the category. The category-level special benefit is converted to a parcel-level benefit by considering the eligible acreage of each parcel. The two land use categories are shown in **Figure 5-1** and identified below:

Lands eligible for Priority CVP Benefit. These lands receive the benefit of the District's Priority CVP water service contract and are also eligible to receive other water supplies provided by or conveyed through the District's System. There are 448,664 acres in this category.

Lands eligible for Other Water Benefit. These lands primarily receive the benefit of other water supplies provided by or conveyed through the District's system. Some may also be eligible to receive secondary CVP water allocations when available. There are 521,827 acres in this category. This total acreage does not include de minimis landowners, District owned lands, and solar.

The special benefit received by these land uses is measured by the average water supply delivered to them in recent years. In order to capture a range of years, the District provided ten years of water delivery information for the two land use categories. The categories, their acreages, and average water deliveries are summarized in **Table 5-2.**

Table 5-2 Acreage and Average Annual Water Use by Land Use Category, 2017-2026

Land Use Category	Acreage in User Class	2016-2026 Average Water Delivery (AF)	Percent of AF Delivered
CVP water use	448,664	471,604	76.53%
Other water use	521,827	144,603	23.47%

5.5 CALCULATION OF ASSESSMENTS PER ACRE BY LAND USE CATEGORY

The proposed total assessment for fiscal year 2027–2028 is $40,064,577.10, representing the aggregate amount to be collected across the two land use categories. The proposed 2027–28 assessment was developed using the 2026–27 budget, as presented in **Table 4-1**, with a 3.8% escalation factor applied for the 2027–28 budget. The allocation for each category is proportional to the special benefit received, as measured by the average annual water delivery presented in **Table 5-2**.

To determine the assessment applicable to each parcel, the total dollar amount assigned to each category is divided by the total acreage within that category, resulting in a per-acre assessment rate. Lands eligible for the Priority CVP Benefit are also eligible to receive other water deliveries; therefore, the total assessment for these properties reflects the combined total of the two applicable category assessments. **Table 5-3** summarizes the proposed per-acre assessments for the 2027–2028 fiscal year.

Table 5-3 Proposed per-acre Assessments for 2027-2028 fiscal year

Land Use Category	2016-2026 Average Water Delivery (AF)	Percent of Average AF Delivered	Proposed 2027-2028 Assessment Total	Acreage Applied to **Land** Class 2026-2027	Proposed Assessment per Acre[1]	Total Assessed Per Acre[1]
Priority CVP Benefit	471,604	76.53%	$30,662,779.42	448,664.05	$68.34	$86.36
Other Water Benefit	144,603	23.47%	$9,401,797.68	521,826.88	$18.02	$18.02
Total	616,207	100.00%	$40,064,577.10			

1- Assessment rates rounded to nearest hundredth

Table 5-4 presents the maximum assessment rates the District may impose based on the Consumer Price Index (CPI) inflation factor of 3.8% as of May 2026. The annual adjustment will occur every May when the parcels are assessed. The annual adjustment shall be equal to the greater of three percent (3%) or the percentage change in the Consumer Price Index for All Urban Consumers (CPI-U), All Items, West Region as published by the U.S. Department of Labor, Bureau of Labor Statistics (or its successor). In no event shall the annual increase exceed six percent (6%) without conducting a new mailed ballot proceeding. The CPI factor does not apply to the 2020A Bond. **The Board of Directors retains the discretion to establish assessment rates below these maximum levels, if deemed appropriate.**

Table 5-4 Maximum Assessment Rate per Acre

Fiscal Year	Annual Assessment	CVP Water Use	Other Water Use
2026-27 [1]	$39,023,550.00		
2027-28	$40,064,577.10	$68.34	$18.02
2028-29	$41,145,163.23	$70.19*	$18.50*
2029-30	$42,266,811.63	$72.10*	$19.01*
2030-31	$43,431,082.67	$74.09*	$19.53*
2031-32	$44,639,596.02	$76.15*	$20.07*
2032-33	$45,894,032.86	$78.29*	$20.64*
2033-34	$47,196,138.31	$80.51*	$21.22*
2034-35	$48,547,723.77	$82.81*	$21.83*
2035-36	$49,950,669.47	$85.21*	$22.46*
2036-37	$51,406,927.11	$87.69*	$23.12*

[1] Fiscal Year 2026-27 is the baseline budget for projections. Proposed assessments begin with Fiscal Year 2027-28.

* Values past Fiscal Year 2027-2028 are estimated by applying the May 2026 CPI of 3.8% to the previous Fiscal Year rate. The actual values are expected to vary each year based on the rate calculation using the escalation formula to determine an annual adjustment as described in Section 4.3.1 (page 4-3)

6 IMPLEMENTATION PROCEDURES

6.1 PROCEDURAL BASIS

In 1996, the District adopted Resolution No. 108-96 electing to utilize the alternative benefit valuation methodology authorized by California Water Code Sections 36577 through 36579. The resolution determined that District assessments would be based on benefit valuations established by the Board rather than actual cash value or county assessed values. The resolution also recognized that different classes of land may receive different benefits and authorized the use of separate valuation schedules and assessments corresponding to those benefits. Since that time, the District has continued to employ a benefit-based assessment methodology consistent with the authority provided under the California Water Code.

Based on an evaluation of the procedural options available to the Board, it is the Engineer's opinion that the proposed assessment structure provides an equitable mechanism for the District to generate revenues necessary to support its operations. The District intends to proceed with an election process in compliance with the provisions of Proposition 218 and Article XIII D of the California Constitution to authorize the collection of a special benefit assessment

Implementation of this assessment framework would enable the District to continue providing surface water deliveries to property owners within the District, protect existing water entitlements, and ensure the beneficial use of the surface water supplies allocated to the District.

The procedural steps required to implement the assessment were previously discussed in Section 1.2. If a majority of ballots received, weighted by the parcel's proportional financial obligation, are in favor of the assessment, the District Board may adopt the assessment. In this approval scenario, the District intends to collect the new assessment with the first installment of the 2027 assessments that are assessed in May 2027 (bills sent out in June 2027), with the assessment due no later than November 2027, for those assessments collected by Westlands Water District.

6.2 PROPOSITION 218 PROTEST HEARING

The District has scheduled a Proposition 218 public hearing (also called a protest hearing) for December 15, 2026 at 9:00 a.m. at its Fresno office located at 286 W. Cromwell Ave., Fresno, CA 93711.
